PROFESSIONAL EXPERIENCE

Data Analyst | Swiss Trade Ventures Pvt. Ltd. | Ernakulam (Kochi), Kerala | July 2025 – Present

- Reduced manual MIS reporting effort by about 40% by automating recurring SQL, Power Query and Excel workflows across sales, operations and procurement data.
- Delivered 3–4 monthly MIS reports and KPI dashboards covering sales, inventory, procurement, operations and marketing data using SQL.
- Validated and reconciled 10,000+ records with SQL, Power Query and Excel, checking duplicates, missing values and inconsistencies.
- Built Power BI and Advanced Excel dashboards for sales, inventory, procurement and operational KPIs; analyzed sales against targets and campaign results to identify trends and performance gaps.
- Gathered requirements from stakeholders, wireframed dashboards (draw.io) and refined layouts after report testing for accurate outputs.

Data Analyst Intern | Swiss Trade Ventures Pvt. Ltd. | Ernakulam (Kochi), Kerala | March 2025 – June 2025

- Cleaned and validated multi-source sales and procurement data with SQL and Excel, and reconciled source data for Power BI and Tableau dashboards against business records.

SELECTED PROJECTS

Kerala Essential Commodities: Price & Supply-Stress Intelligence | Advanced Excel, Python, pandas

- Built a monthly price-risk early-warning MIS in Excel from 701,948 official retail price records (14 districts, 72 commodities): 0–100 risk score, Top 10 alerts, watchlist, heatmap and district view.
- Cross-validated all 1,560 scored commodity-months against Python with no mismatches; flagged dry chillies as the only Red alert in Feb 2026 (+15.0% MoM, +41.9% YoY).

Bank Loan Risk Intelligence | SQL Server, Python

- Built an 8-feature WOE/IV scorecard on 150,000 LendingClub loans, validated out-of-time (AUC 0.671, KS 24.06); Grade B defaults ranged from 8.1% to 21.7%, a 2.7x spread inside one lender grade.
- Delivered a 3-page Power BI dashboard with an approval-cutoff simulator on a SQL Server star schema.

Business Performance 360° (Synthetic Dataset) | Power BI, SQL Server, DAX, Power Query

- Built a four-page Power BI dashboard over 15,000 orders using SQL-based ETL, a star schema and DAX KPIs; surfaced 32.65% YoY revenue growth and delivery-delay risk by state.

Marketing Intelligence Analytics | SQL Server, T-SQL

- Applied RFM segmentation to 2,240 customers: Champions and Loyal customers were 46% of the base but 84% of revenue; Campaign 2 converted at 1.34% against 6–15% for the others.

More on portfolio: RavenStack churn analysis (₹5.36 lakh monthly revenue at risk; synthetic data), Healthcare ED Throughput, HR Attrition Analytics.
