PROFESSIONAL EXPERIENCE

Data Analyst | Swiss Trade Ventures Pvt Ltd, Ernakulam | Jul 2025 – Present

- Automated recurring sales, operations, and procurement reporting using SQL, Power Query, and Excel, reducing manual reporting effort by 40%.
- Built Power BI and Excel dashboards supporting three to four recurring monthly KPI reports across sales, inventory, procurement, and marketing.
- Partnered with business teams to translate reporting requirements into KPI reports and dashboard insights for management decision-making.
- Validated and reconciled 10,000+ business records using SQL, Power Query, and Excel, identifying data-quality and reporting discrepancies.
- Analyzed 2,240+ customer and campaign records, identified a 1.34% response rate against a defined 6-15% benchmark, and flagged campaign underperformance.

Data Analyst Intern | Swiss Trade Ventures Pvt Ltd, Ernakulam | Mar 2025 – Jun 2025

- Cleaned and validated multi-source sales and procurement data using SQL and Excel to support recurring business reports used by management.
- Reconciled source records against dashboard outputs, identifying and resolving recurring data discrepancies in reporting.

SELECTED PROJECTS

Bank Risk Intelligence | End-to-End Credit Risk Analytics

SQL Server | Power BI | Python

- Built a three-page Power BI dashboard on 150,000 loan records, including a What-If score-cutoff simulator for approval-rate and default-risk trade-offs.
- Designed a SQL Server star-schema warehouse and eight analytical queries for vintage cohort, grade, geographic, purpose, and DTI analysis.
- Identified and annotated right-censoring bias in vintage trend data, preventing a misleading conclusion that portfolio risk was improving.

Business Performance 360° | End-to-End BI & Reporting

SQL Server | Excel | Power Query | Power BI | DAX

- Built a four-page Power BI dashboard using SQL Server, Power Query, data modelling, and DAX to analyze revenue, profit, geographic performance, product profitability, and operational risk.
- Identified regional revenue concentration, product profitability patterns, and delivery-delay risks to support management-focused performance analysis.

RavenStack | Subscription Intelligence & Revenue Recovery

Python | SQL Server | Power BI

- Analyzed a simulated subscription dataset using Python and SQL Server to identify ₹5.36 lakh in monthly recurring revenue classified as at risk, based on project-defined criteria.
- Built KPI analysis around customer risk and revenue recovery, estimating approximately ₹3.2 lakh in potential annual recovery based on defined project assumptions.
